Three Magazines Name Marshall Work as Top 1997 Stories

Three national science and engineering publications have recognized some of MSFC's work as top stories during 1997. In its special January issue, *Discover* recognized gamma-ray bursts as one of its "Top 100 Science Stories." The editors of *Science*, in December, named gamma-ray bursts a "1997 Breakthrough of the Year." Also, in the year-end issue of *Aerospace Engineering*, readers voted the Marshall-managed Reusable Launch Vehicle program as a "Top 15 Technology" story.
